Reduce Wasted Food

In an effort to reduce the amount of food waste sent to landfill, StopWaste has developed a grant program focused on food waste prevention and the recovery of food to feed people. The target audience is institutional kitchens/high volume food service operators as well as organizations involved in the recovery of food to feed the hungry. As shown to the right, food waste prevention and recovery of food to feed people are the top two tiers of the EPA's Food Recovery Hierarchy. For more information, visit

www.stopwaste.org/preventing-waste/food-waste-prevention-grant.

Deadline for application is June 30, 2015.

Skip the Straw

According to the Ocean Conservancy, if 25,000 people choose to “skip the straw” every time they visit a restaurant, **5 million plastic straws will be kept out of our oceans and landfills in just one year.** If your business provides straws to staff or customers, consider ending that practice or switching to compostable paper straws. The ReThink Disposables Toolkit and grant mentioned above could help!

Service Reminders

- ✓ Flatten and/or cut boxes to maximize space in your **Recyclables** cart or bin.
- ✓ Place recyclables directly into the **Recyclables** cart or bin. Do not use plastic liner bags. To recycle shredded paper, contain shreds in a paper bag or box to prevent pieces from blowing away during collection.
- ✓ Put Styrofoam® takeout containers in your garbage. Choose reusable, recyclable or compostable alternatives whenever possible. Foodservice businesses in the City of Livermore are prohibited from using Styrofoam® takeout containers.

Holiday Schedule

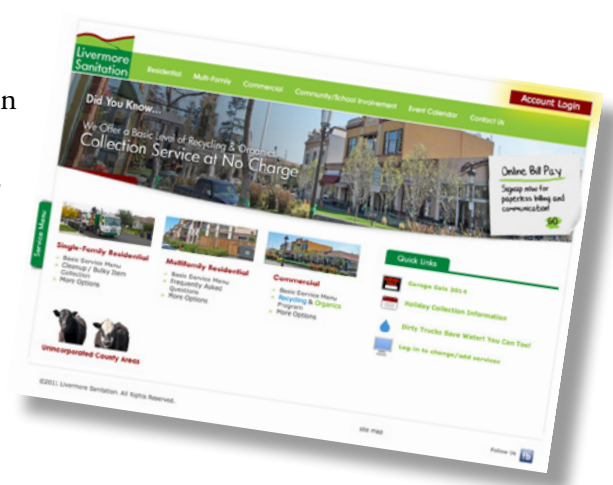

Service will be provided as usual during the weeks of Independence Day and Labor Day.
